Looking at all modes of transport, presentations /discussions focuses on some issues in particular:

1. What were the past activities in your country in terms of international cooperation (with European Union and others)?
2. What are the ongoing activities in your country in terms of international cooperation (with European Union and others)?
3. Which instruments do you have in place for international cooperation (not only with the European Union, other countries)?
4. What were/ are the key issues of past or current international cooperation with European Union?
5. What areas are you willing to cooperate in the future with European Union?
6. What are your expectations for the future activities in terms of cooperation with European Union? And what instruments could be put in place?
7. What funding schemes do you have in place for international cooperation in transport research?
